ANALOG ANCHOR // PRODUCTION BASELINE

Current Android v2.0 Architecture & Design System — Reference Sheet for iOS Product Team

ANDROID JETPACK COMPOSE / M3 | TARGET: iOS / SWIFTUI & HIG | FEMALE-LED CLIENT DEMOGRAPHIC | ONE-PAGE SUPER AI SPEC

01 COLOR SYSTEM TOKENS — Color.kt

ObsidianBg `#0B1012` Root Canvas	**ObsidianSurface** `#11191D` Glass Base 85%
DeepPanel `#172126` Modals & Sheets	**ObsidianBorder** `#2B3A40` Specular Borders
GlowGreen `#7DEEFF` Cyan Accent Aura	**CyanAura** `#1FE6FF` Gradient Stop
WarmOffWhite `#F3F8FA` Primary Text	**WarmSilverText** `#D1DCE1` Secondary Text
SignalAmber `#F3B65C` Caution & Timers	**SignalRed** `#FF5252` Hard Lockouts

GRADIENTS & SPECULAR BRUSHES

- `GlowGreenGradientBrush` — `#7DEEFF → #1FE6FF`
- `PremiumDarkRadialBrush` — `#0E1A1E → #0B1012 (1800f)`
- `SteelGradientBrush` — `#F3F8FA → #A2AFB6`

Palette Architecture: Built in Android Compose around tactile minimalism—deep matte obsidian backdrop combined with crisp cyan-mint light refraction. Light mode counterpart alternates to clean alabaster (#F3F8FA) and frosted titanium.

02 TYPOGRAPHY & UI KIT — Type.kt / GlassCard.kt

DISPLAY LARGE • 40sp / 46sp — Outfit Black 900

00:45:00

TITLE LARGE • 24sp / 28sp — Outfit Bold 700

Two-Tap Focus Anchor

BODY LARGE • 15sp / 22sp — Outfit Medium 500

Gross-motor physical contact breaks autopilot dopamine loops. Willpower is finite; physical anchors preserve clarity.

• COMPOSE TACTILE COMPONENTS

▶ START DEEP WORK BLOCK

Desk NFC Anchor
Tap 1 Ignition Verified
• ACTIVE 25m

Mindful Gateway (5s Pause)
Liquid breathing intercept • 15s silence kick
REMAIN: 42m

Tactile Feedback Contract: Buttons utilize 3% scale-down micro-compression animation with zero stock ripple, replicating a physical analog switch.

03 PRODUCTION SCREEN ARCHETYPES — Android Screens

UNDERLYING BEHAVIORAL ENGINE

Physical Presence Protocol — `Desk NFC Tap 1 & 2`
Requires physical tap at desk to ignite session; completion alarm sounds until physical 2nd tap seals whiteboard reflection.

Circadian & Sacred Anchors — `Offline Astro GPS`
Fajr wake challenge (Bedroom NFC + 25 steps + Ayah typing) + Pre-Adhan Soft Landing (5m DND transition).

Accountability Ledger — `500 PTS / Friday Reset`
Tracks positive habit adherence. Resets cleanly every Friday morning before Jumu'ah to eliminate despair.

04 IOS TRANSLATION & BRIEF — Creative Freedom

STRATEGIC CONTEXT & CLIENT PROFILE

Our primary commercial audience is **predominantly iOS-based and heavily female/ladies**. They seek mindful calm, elegant life architecture, and intentional self-sovereignty—not aggressive gamer hardware aesthetics.

CREATIVE LATITUDE FOR IOS DEVELOPER / DESIGNER:

1. Visual Softness & Tonal Elevation
Do not feel constrained to duplicate Android's high-contrast dark obsidian. Feel completely free to explore warmer taupe, subtle champagne/rose tints, or an ultra-clean light mode with Apple's native `.ultraThinMaterial` frosted glass.

2. Native Apple Screen Time API
Replace Android's Device Admin & Accessibility Service with native Apple frameworks: `FamilyControls`, `ManagedSettings`, and `DeviceActivityMonitor` for battery-efficient system-level app shielding.

3. Apple Ergonomics & Dynamic Island
Leverage Live Activities & Dynamic Island for the floating focus timer pill. Integrate NFC Shortcuts, Action Button triggers, and Apple Watch companion taps for seamless tactile rituals.

4. Core Behavioral Invariants
The foundational mechanics must remain uncompromised: **Physical Grounding** (NFC / motion), **Non-Reversible Pre-Commitment** (locked anchors), and **Sacred Circadian Pauses**.

Developer Scope Note: This document serves as your functional and behavioral baseline. Build upon this foundation to craft a world-class, serene iOS experience.
